

SHEIKH AADIL ALTAF

Srinagar, India 190006

aadilaltaf19@gmail.com / +917006256047

SUMMARY

Full-stack engineer with almost 8 years of experience in developing MEVN and MERN applications and cross-platform mobile solutions. Proven expertise in creating efficient user interfaces and robust back-end systems. Strong commitment to writing clean code and solving practical software development challenges.

TECHNICAL SKILLS

- Languages - JavaScript, TypeScript, Python, PHP.
- Frameworks, libraries - Vue, React, Angular, Pinia, Vuex, Redux, Vuetify, Quasar, PrimeVue, Nuxt, Node.js, Express.js, Django, Flask.
- Mobile - Capacitor, Cordova, Android, iOS.
- Tools - Git, JIRA, Vite, Webpack, Postman.
- Testing - Selenium, Unittest, Requests, Nightwatch.js, Playwright.
- Others - Cursor, Claude Code, WebRTC, Socket.io, Auth0, jsPDF, PDFLib, Canvas API, Web Audio API, Solid Principles,
- Databases - MySQL, MongoDB, SQLite.
- DevOps - Linux, Docker, Vercel, AWS, GCP, Firebase, Kubernetes.

EXPERIENCE

Senior Fullstack Engineer / Proxify - Srinagar, Remote

02/2026 - Current

- Selected as part of Proxify's vetted global developer network, collaborating on client engagements ranging from short-term projects to long-term dedicated assignments.
- Develop and maintain modern web applications using **Vue.js, TypeScript, JavaScript, Node.js, PHP, Laravel, and MySQL**, depending on client requirements.
- Build responsive, scalable frontend applications, integrate REST APIs, and contribute to backend services for full-stack solutions.
- Adapt quickly to different client domains, legacy codebases, and modern technology stacks while maintaining high code quality and documentation standards.
- Leverage AI-assisted development tools such as **ChatGPT, Claude, Cursor, and GitHub Copilot** to improve development speed, debugging, and code quality.

Senior Front End Developer / Digital Wave Technology - Srinagar - Remote, IN

12/2025 - 02/2026

- Working on building scalable, enterprise UI applications using Vue.js and modern JavaScript/TypeScript practices for the company's AI-native enterprise ONESM platform. I collaborate with backend, product, and design teams to deliver responsive, maintainable, and high-performance frontend features aligned with business needs.

Senior Fullstack Engineer / Doc2u - Toulouse, France - Remote

05/2023 - 11/2025

- Rebuilt and enhanced the application UI for the **Doc2U ONE medical device** using **modern JavaScript (ES6+), React, Vue.js, and Vuetify**, improving usability and performance.
- Migrated backend services from **Java / Spring Boot** to **JavaScript-based Node.js / Express APIs**, improving development velocity and stack consistency.
- Developed a **cross-platform health-hub application** using **JavaScript-based Quasar Framework + Capacitor**, enabling seamless Android and iOS support for multiple IoT medical devices.

- Successfully migrated multiple applications from **Vue 2 (Vuex)** to **Vue 3 (Pinia)**, leveraging modern JavaScript patterns and Composition API.
- Implemented **real-time medical device communication** using **JavaScript with Socket.io and WebRTC** for devices such as **Otoscope and Stethoscope**.
- Built advanced **JavaScript Canvas API** features to support **otoscope image capture and video recording**, and integrated captured media into dynamically generated PDF medical reports.
- Implemented **JavaScript-driven PDF report generation** for device measurement data, ensuring accurate and downloadable clinical reports.
- Designed and developed a **stethoscope spectrum analyzer** using **JavaScript Web Audio API** to visualize live audio signals.
- Implemented the complete UI for **MyAuditCorner SaaS application** using **JavaScript, PrimeVue, and Tailwind CSS**, and integrated frontend workflows with **Firebase Firestore APIs**.
- Automated **end-to-end testing using JavaScript (Nightwatch.js)**, increasing release confidence and reducing regression issues by approximately **40%**.

Fullstack Engineer / SonicWALL - Bangalore, India

05/2018 - 05/2023

- Contributed to frontend development for GEN7, Switch, and NSM platforms using modern **JavaScript (ES6+)**, **Vue.js, React, and Vuex**, delivering scalable and secure enterprise UI components.
- Integrated and consumed RESTful APIs using JavaScript, handled async data flows, and implemented frontend integration fixes to improve system stability across Vue and React-based applications.
- Worked closely with backend and QA teams to debug UI-API interactions and resolve complex frontend issues.
- Implemented **UI automation using Selenium** and **API testing using Python Requests**, ensuring reliable coverage for JavaScript-based frontend workflows.
- Designed and built a **custom test automation framework** using **Python (unittest)** to validate frontend and API behavior, reducing the overall bug backlog by **30%**.
- Developed a **failure analysis tool** using **PHP**, enabling rapid inspection of test logs and faster root-cause analysis for frontend and backend failures.

EDUCATION

Bachelor of Technology : (CSE)

09/2017

Islamic University of Science And Technology - India

- Capstone Project - Health Monitoring System using Wearable Sensors

ACCOMPLISHMENTS

- SPOT AWARD WINNER (2019–2020) - Sonicwall

Recognized for extraordinary effort and delivering innovative solutions. (10/2019 - 10/2020)
